ABOUT ME

I'm a second-year uni student studying computing at Melbourne, and I've grown up around tech. My dad ran a computer repair shop and I spent a lot of my early teens helping out there, so I know my way around hardware. I've worked in hospitality and tutoring since then, both of which taught me great communication skills and how to work well under pressure. I'm looking for part-time or casual work alongside my degree, somewhere I can be useful straight away and keep learning on the job.

WORK EXPERIENCE

Waiter

NOV 2024 – FEB 2025

Tony's Lord Nelson Restaurant, Auckland NZ

- Worked full-time front of house over the busiest months of the year at a well-known Auckland steakhouse.
- Took orders, ran food, handled payments and looked after up to eight tables at once during peak dinner service.
- Dealt with all sorts of customers: regulars, tourists, big group bookings, and learned to read what people actually need quickly.
- Worked closely with kitchen and bar staff to keep our service efficient.

Tutor

SEP 2022 – NOV 2023

NumberWorks'n'Words, Wellington NZ

- Tutored maths and calculus to students from Year 4 through to Year 13 at a Math / English learning centre.
- Worked out how each student learned best and changed my approach to cater to each different student. Some learnt better visually, while others needed to work through it themselves.
- Explained things repeatedly and patiently without making anyone feel stupid, and helped them grow.
- Kept notes on student progress and gave feedback to parents on where their kid was tracking.

Technical Assistant

JAN 2017 – DEC 2018

Vast Computers, Lower Hutt NZ

- Helped out at my dad's computer repair shop with diagnostics, PC building, cleaning and general servicing.
- Was able to get hands-on with PC internals early, allowing me to grow and learn about computers from a very early age.
- Talked to customers about what was wrong with their computers and how to fix the issues.

EDUCATION

Bachelor of Design — Computing Systems
JUL 2025 – PRESENT

University of Melbourne

- Studying computing systems through a bachelor of design, so a mix of the technical and coding side, alongside the artistic and creative UX experience people want.

Bachelor of Science — Computer Graphics & Games, Mathematics
2024 – 2025

Victoria University of Wellington

MATH199 Calculus (STAR Programme)
2023

University of Canterbury

- Took a first-year uni calculus paper while still at high school and had a 90% (A+).

NCEA Levels 1–3
2019 – 2023

Hutt Valley High School

- Passed all three levels with Excellence. Top of year in Accounting (2021) and Top Scholar in Form (2020).

SKILLS

- Customer service in high volume environments
- Explaining technical concepts in plain language
- Hardware troubleshooting and diagnostics
- Multitasking under time pressure
- Adapting how I communicate to different people
- Handling complaints and difficult customers
- Cash handling and POS systems
- Quick to learn new systems and software
- Fast and accurate typing
- Tutoring and mentoring
- Teamwork in fast paced environments
- Reliability and punctuality

TECHNOLOGICAL SKILLS

PC building and troubleshooting · Windows and macOS · Gaming consoles and peripherals · Headphones and audio gear · Cameras and photography basics · Procreate and Photoshop · Java, HTML and CSS, C · Microsoft Office and Google Workspace

OUTSIDE OF STUDY

I draw a lot. I started with a lot of traditional art growing up, but now I've moved to mostly digital art, and I'm slowly teaching myself 3D modelling. I enjoy gaming, follow boxing and MMA closely, and train on and off at a boxing gym. I'm also into photography and music.

AVAILABILITY & DETAILS

Availability	Thursday to Sunday, all day. Classes run Monday to Wednesday, and I'm free across university breaks.
Work rights	Available on request.
Location	Melbourne CBD, walking distance to city stores.
References	Available on request.
